Like any other drug, Sildenafil Citrate can cause some mild side effects and do not last longer than a few hours. There is very little evidence found against severity due to Sildenafil Citrate and in most cases it occurs due to over dose. Mild side effects like headache, flushing of the face and stomach disorder can be caused by Sildenafil Citrate. In some cases, it is reported that erection stands for hours. If you find that your erection stands more than 4 hours, then immediately you should consult with your physician. Otherwise, a permanent damage may occur to your penis.

We manage an 'Online Pharmacy' with a real combination of professional ethics and intrinsic sincerity and have got bases both at 'Argentina' and 'Europe'. We constantly take care to stick to our specialty of dealing straight with the manufacturing laboratories and thus making sure that our items are permanently up to the mark and will pass any quality check. We are confident that our products are at all times fresh and new. So we store them in bulk quantities and hence we are able to satisfy our customer's demands at all times and that too at a reasonable rate! If you want you can buy and store them in large volumes. But here let us make it very clear that we sturdily dissuade the method of 'self-prescription' and 'self-medication' as it is very dangerous for the physical and mental condition of the individual concerned. Always take care to consult a legally authorized medical consultant before you consume any medicine irrespective of the place from where you bought it!

Sildenafil (know it as Viagra ) is tried for treating problems linked with men sexual function. Viagra has the effective ingredient Sildenafil which blocks the enzyme phosphodiesterase-PDE5, in addition to sexual stimulation, aids the flow of blood to the penis for preserving erection.
